VERIFICATION: UNVERIFIED

So if the photo isn't old or staged* for some reason, it can be concluded that for the strikes in Donetsk on August 26, the Ukrainians employed at least one French-made SCALP-EG long-range cruise missile. Although the wings of SCALP are made of composite materials rather than metal, as the one seen in my cited post. Independent confirmation remained limited during the reporting window.

Almost six months into their war, the two sides are locked in a stalemate, with Iran keeping the key Strait of Hormuz shut and Washington persisting with a naval counter-blockade of Iran. Under political pressure at home over the impacts of the conflict, US President Donald Trump has pivoted away from military action to economic levers, expanding sanctions and warning of consequences for countries that do not join. But Iran -- which has already weathered decades of sanctions -- has remained defiant, with officials saying they have a two-year plan to.....
